---

Per brief discussion with Brescia, below is contact information for a resident that has been affected by Lard Oil.

Local Fire has advised (b) (6) and residents not to return to their homes due to strong odors. LDEQ has not provided the residents with any information regarding screening their neighborhood. No Health agencies have contacted the residents.

Do we have resources available to screen the neighborhood and advise the residents on what actions they should be taking? They don't know if they should start cleaning their homes or wait on an agency to give them clearance.

Many containers of oil were found strewn throughout the neighborhood. 5 gallon jugs to barrels and a few larger containers. Lard Oil is a distributor for Exxon Mobile.

(b) (6)

Resident Affected by Lard Oil

(b) (6)

I will forward the NRC report shortly.

Thanks guys!
